The open of teeth is less than pipe diameter to prevent falling, get effective clamping and adjusting jaw.

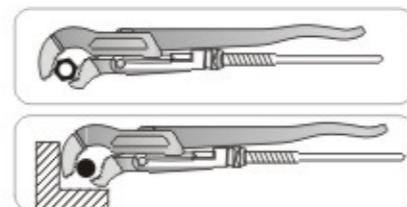

The whole wrench is made of drop forging from the material CR-V carbon steel and hardened by large mesh belt furnace.

Jaw will force effect on the three points at the same time, gently strength can firm clamping.

Pliers library made by 45# Carbon Steel, Hardened by large mesh belt furnace

Effectively prevent slip artifacts, ensure that get the largest mobile freedom in the limited space.

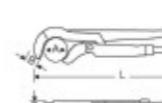

Jaw can be perfect adapt to a variety of different appearance, will not damage the workpiece hexagonal screw clamp.

*Polyester:knitted based polyester is the most popular cover fabric with good area coverage and good recovery after being crushed. Its absorbency of paint improves with pile height increasing.
*Acrylic:cwoven base, it's lint-free 100% acrylic for all paints with good paints absorbcy and large area coverage.
*Pure wool,specially made for all types of viscid and intensively solvent-containing lacquers,paints and other coatings.
*Pottscorer:it's a family of flexible polyurethane foams with high mechanical strength and density. It resists a better tear resistance.Compression hardness compared with traditional polyester. It shows a high hardness and s superior tear resistance.
