HAND TYING MACHINE

Fixing/binding all kinds of liana plants such as flowers, grapes ect

Main Characters:

- Labor saving, it can bind 3-4 times more than plants than by hand in a unit time.
- Time saving: it costs less time, so when farmers are busy with the planting, they can have more time to do the other things like sprinkler. And they can also increase the plant area, because of the high efficiency.
- Tapetool is only 0.5kg, very convenient to take.

Saber Tooth
Shovel With Long
Fiberglass Handle

This hard-to-find
sawtooth shovel was
originally developed
for landscapers to dig
through compacted
soil and tough roots,
but can also be used
for removing shingles,
nails, chipping ice and
more! Heavy-duty
blades are constructed
of heat-treated carbon
steel, so they can be
sharpened like a knife
for greater cutting
strength.
